

## WaveTouch-Express

WaveTouch-Express is a business class service designed for the small business market that provides business quality services at competitive pricing. Unlike other competing services, WaveTouch-Express is designed to support businesses from the ground up with 7Mbps of download speeds, 2Mbps of upload speeds, a static IP addresses, professional installation, and a knowledgeable support team local to the area.

Spectra Access is dedicated to providing businesses with the best service and reliability in the industry. As a leading telecommunications service provider in New Hampshire, Spectra Access lets you choose a broadband solution that balances competitive pricing with the performance, features, and room needed to grow your business.

## WaveTouch-Digital Voice

Our optional digital voice services provides businesses with reliable voice capabilities and common business features for far less than traditional telephony. Designed with the small to medium size business in mind, our Digital Voice solution is a great option when looking to simplify billing and consolidating your data, Internet, and voice services onto one bill.

Our voice solutions are 100% compatible with existing equipment, so changing over to WaveTouch Digital Voice is simple and completely hassle free. You even get to keep your existing telephone numbers.

Spectra Access delivers flexible, low cost alternatives to expensive fiber and leased copper circuits. With no dependence upon the local telephone infrastructure, Spectra Access is able to install our service within days with greater reliability than cable or telephone solutions.

\*Service is available in limited areas, Please contact a Spectra Access Sales Associate for further information. Actual speeds vary and are not guaranteed. Customers needing guaranteed speeds should consider Spectra Access' WaveTouch-Internet services.
